

## REMARKS

Entry of the above-amendment and reconsideration and withdrawal of the rejection are respectfully requested.

The rejection of claims 1-7, 9, 11, 13, 14, 27, 34, and 35 under 35 USC 102(b) as being anticipated by Butterworth et al is traversed. Applicant's invention is directed to a household product that is limited to a cleaning, sanitizing, polishing, pesticide, or toilet preparation product. Butterworth et al is directed to a fabric softening composition which does come within the scope of any of the household product definition of the instant invention. In other words, applicant's invention has been limited to exclude fabric softening composition. As a matter of fact, claim 27 which is directed to a "laundry softener composition" that was inadvertently left in after the narrowing of the claim has now been cancelled so that there is support for all of the species claims. Hence, this patent is now limited to a narrow group of household care products that exclude fabric softeners. Therefore, this patent clearly does not anticipate the instant invention.

For the reasons set forth above, it is submitted that this application is now in condition for allowance and prompt notification thereof is respectfully requested.

Respectfully submitted,

  
David Edwards
